FOR IMMEDIATE RELEASE

InsightSoftware.com's new release makes budgeting a breeze for JD Edwards customers

Faster & easier budgeting, enhanced calculations, more pre-built reports including Payroll and Data Warehouse Management, and Portuguese language support among the new capabilities.

DENVER, CO—Aug 30, 2011— InsightSoftware.com announced today a new release of their Insight Software Suite for JD Edwards ERP customers.

The Insight Software Suite solves the problem of getting the goldmine of data out of JD Edwards ERP systems and into the hands of the people who need it, giving them answers to their critical business questions. The new release boasts many new enhancements including:

- Significant enhancements to Insight Budgeting™ including Intelligent Excel™ Modeling and a Budgeting Lite application
- Enhanced calculations for more robust reporting in Designer Express
- Many more pre-built reports and SmartSets including Payroll and Data Warehouse Management
- Addition of language support for Portuguese

“This release contains features that round out every area of Insight, including reporting, budgeting and reconciliation. A major portion of this release has been focused on making the budgeting process easier for our customers,” says Julie Holmes, product manager for the JD Edwards division of the Insight Software Suite. “As a former JD Edwards consultant, I have direct experience with the frustration of spreadsheet mayhem during the budgeting process. We just made it easier for our customers by automating the process, giving access to the business unit owners and allowing full modeling and budget control with a single source of record.”

Beta customers had positive response to the new features. Kim Melnychuck of Flint Energy Canada says, “One of the biggest benefits is that Insight Budgeting gives us 100% control in an area where we can't risk reporting inaccurate figures. And we no longer have to rely on multiple spreadsheets and worry about versions, broken links and outdated data. This is enormous for us because we have 20,000 business units.” Adds David LaPointe of IT at Flint

Energy, “What used to take a person weeks to hand-enter now takes minutes. It’s not just the savings in cost and time, it’s the confidence that the data is accurate and there is no risk of human error in that process.” To this, Holmes states, “No one else can give JD Edwards customers full control over their budgeting process yet push it out to the business owners with complete confidence in the process. We call it Insight Budgeting.”
